CONDITION OF JAIL.

Committee Appointed by Judge Paul Makes its Report.

IT'S IN GOOD SANITARY CONDITION

And of Wholesome Appearance. Food Supply Good and of Excellent Quality—Faint Found With Hot Water and Fresh Air Supply—Condition of Dungeons and Padded Cells—Many Improvements Suggested.

Dr. C. M. Frissell, G. W. Kennedy and R. T. McNichol, a committee appointed by Judge Paul of the circuit court, to examine into the condition of the county jail, filed their report yesterday afternoon. They state that at the time they examined the structure there were thirty-six prisoners confined there—twenty-seven males and nine females. The 101 cells were found to be in excellent sanitary condition, the inside of the building and cells were thoroughly whitewashed and presented a wholesome appearance. The food supply was abundant, well cooked and of good quality. The kitchen and utensils were in perfect order.

The committee found fault with the hot water supply, claiming that it was far from satisfactory and was a great hindrance to the daily routine of the officials. The committee recommended that an abundance be supplied early in the morning, so that all buckets can be thoroughly scalded, the cells scrubbed and the toilet of the inmates can be made. In view of the approach of summer the committee lays especial stress on this point.

The conditions of the dungeons and padded cells were found "to be inhuman and dangerous to those confined in them," and the committee recommends that they be repainted and a closet placed in each.

The committee says that a water closet in the tower is an absolute necessity. It can easily be connected with the drain pipe, and will add much to the comfort and convenience to the parties interested.

Cells numbered 48 and 49 were pronounced insecure, the iron bars having been cut. The bath room windows are also insecure, there being no protection from the outside; iron railings were also loose. In the opinion of the committee close wire screens should be placed on all the windows of the female cells.

The electric light was found to be in bad condition, and ought to be repaired at once. The construction of the roof over the jury room is faulty, leaking through the jury room to the kitchen and endangering the plastering. The locks were judged to be poor and insecure; five good and different locks are an immediate necessity. As a matter of economy the committee recommends that a cement or brick floor be put in the cellar, and the wooden door replaced with an iron one.

It was discovered that the fan for supplying fresh air has been neglected. The recommendation of the committee is that it should be connected and a constant current of fresh air maintained day and night. A door in the basement for the air course would add much to the security of the jail.

ON TO FAIRMONT.

Knights Templar and Shriner will Meet There Soon.

On May 8 the Knights Templar of West Virginia meet in bi-annual convocation at Fairmont, and on the next day the Oarls Temple, Mystic Shrine, will hold a special meeting at which a large class of candidates will make the memorable journey across the sands that never cook. The two local commanderies Knights Templar, Wheeling and Cyrene, will both be largely represented, and as most of them are Shriner, the meeting of that body will be also largely attended. The committee of the local Templars has arranged for a special train over the Baltimore & Ohio road that will leave Wheeling for Fairmont at 7:45 a. m. May 8, and it is expected that at least one hundred will go from Wheeling.

FINE SUITS—THE HUB CLOTHIERS.

At Last the Deed Is Done!

All things comes to him who waits. But ours hasn't been an idle waiting. We never worked harder—more persistently. But now in the bright dawn of a new season comes the crimson sun of success. Close your account at the cheap tailors. You can forever turn your back on the troubles and trials of bothering with measures and putting up with vexatious delays. The height of our ambition has been realized. We have just received from the manufacturers a line of SUITS you would never dare to think could sell for less than \$15 to \$18—Garments that if the to-order shops offered to produce their like at \$18 or even \$20 you'd think it a dirt cheap bargain—and our price is only—

\$10.00 and \$12.00!

We'll confess a sacrifice of part of the profit, to the end that we might command better fabrics—we'll confess to the employment of the same skill, talent and patterns that have made our fine grades the peers of all tailoring possibilities. What concessions cold cash and large orders could command from the manufacturers we have turned into bettering the linings and the trimmings. We want every man's honest and candid opinion of these SUITS. No matter if you've already supplied yourself, pass judgement on them. If you're still on the hunt for the biggest money's worth, you've struck the scent—brought the game to bay—you've only to single out your preference from the immense variety—and go forth clad in garments that will disarm criticism, wring astonished praise from tongues that know value and appreciate the worth of it.
